

CS LIQUID 5L, TEAR GAS

CS LIQUID is designed for use in police units during controlling demonstrations and riots in different conditions, for refilling of spray bottles or for water jets filling. The solution contains irritating CS.

DESCRIPTION

CS liquid is packed in metal can. The carrier of CS is a 2-methoxy ethanol, which is not carcinogenic, and does not present a threat for any organ damage, in relation to methylene chloride, which was characterized as a carcinogenic substance.

OPERATION

Before the action, open the can and fill the device for spraying.
